An original contract riflescope for the U.S. Military Mark 12 5.56mm Special Purpose Rifle (SPR) program, the NXS 2.5-10x24 is back in action. But only for a limited time.

Standard features now include many enhancements over the original model including: an integrated power throw lever, improved ZeroStop™ elevation control, and a capped windage adjustment.

The low mounting profile, versatile magnification range, and streamlined proportions make it ideal for most any AR platform rifle. These same features also make for a perfect pairing with most mountain or safari rifles.

This limited product run is only available through the following authorized Nightforce Optics Dealers:

EuroOptic
MidwayUSA
